

Septic System Maintenance Checklist

Daytona Septic | daytonaseptic.com

Inspect system

Professional check every 1 to 3 years

Pump when necessary

Typically every 3 to 5 years, based on use

Conserve water

Spread out laundry, use efficient fixtures

Avoid harmful materials

No wipes, grease, paint, or harsh chemicals

Protect drainfield

Keep vehicles, structures, and trees off it

Fix leaks

Running toilets and drips overload the tank

Watch for warning signs

Slow drains, odors, soggy or extra-green grass

Keep maintenance records

Log dates, service performed, and technician

Service record

Date	Service performed	Technician	Notes
